

AI for Social Good: Key Techniques, Applications, and Results

MILIND TAMBE

Founding Co-director, Center for Artificial Intelligence in Society (CAIS)

University of Southern California

tambe@usc.edu

Co-Founder, Avata Intelligence

USC Center for Artificial Intelligence in Society (CAIS.USC.EDU)

6/27/2017

2

Mission Statement: Advancing AI research driven by...

Grand Challenges of Social Work

- Ensure healthy development for all youth
- Close the health gap
- Stop family violence
- Advance long and productive lives
- End homelessness
- Achieve equal opportunity and justice
- ...

6/27/2017

3

Overview of CAIS Project Areas

AI for Assisting Low Resource Communities

- Social networks: Spread HIV information, influence maximization
- Real-world pilot tests: Big improvements

6/27/2017

4

Overview of CAIS Project Areas

AI for Earth

- Machine learning/planning: Predicting poaching spots, patrols
- Real-world: Uganda, South Asia...

6/27/2017

5

Overview of CAIS Project Areas

AI for Public Safety and Security

- Game theory: security resource optimization
- Real-world: US Coast Guard, US Federal Air Marshals Service...

6/27/2017

6

AI Program: HEALER

6/27/2017

7

HIV Prevention Programs: Using Social Networks to Spread HIV Information

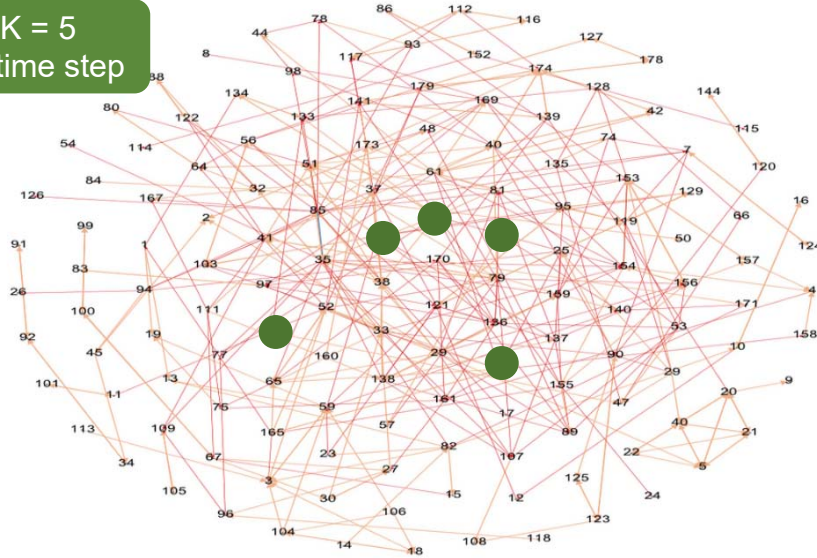

6/27/2017

8

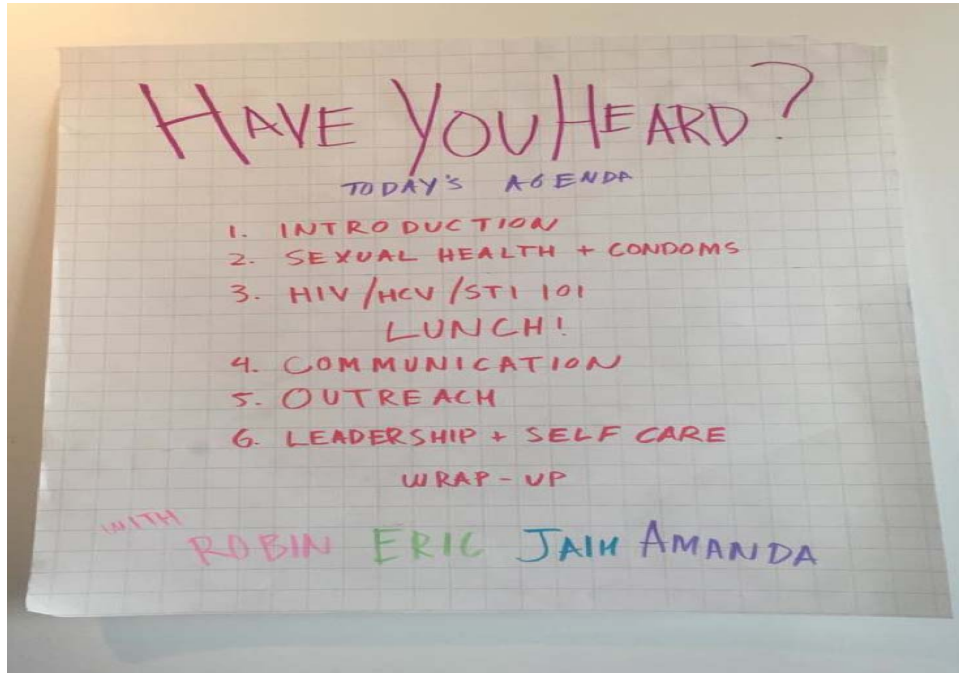

Challenge: Adaptive selection in Uncertain Network

K = 5
1st time step

6/27/2017

9

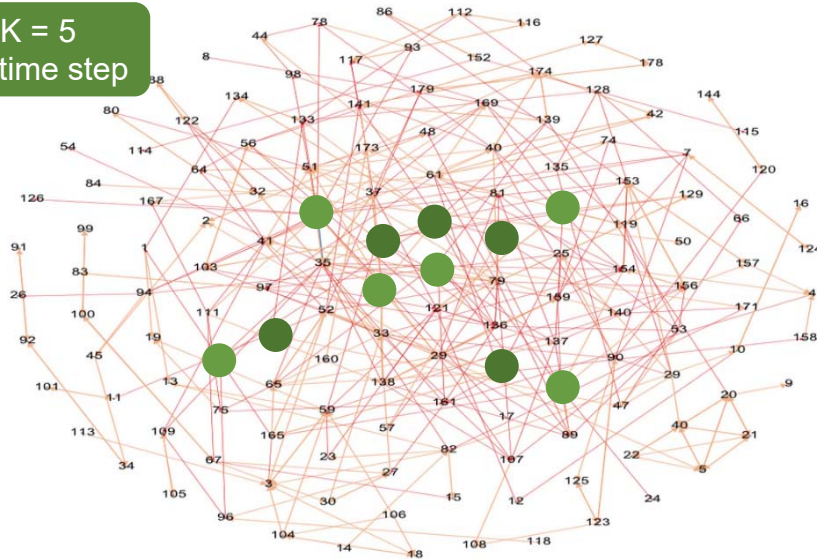

6/27/2017

10

Challenge: Adaptive selection in Uncertain Network

K = 5
2nd time step

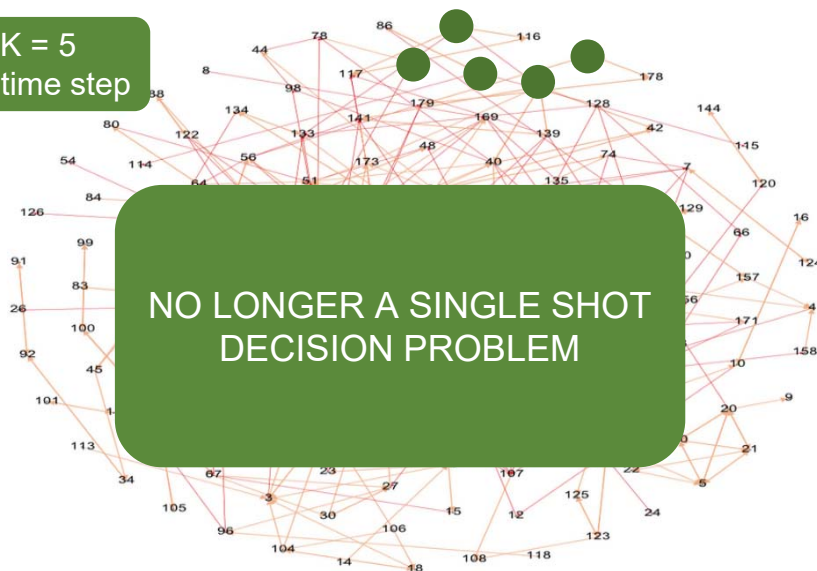

6/27/2017

11

Challenge 3 : Adaptive selection

K = 5
3rd time step

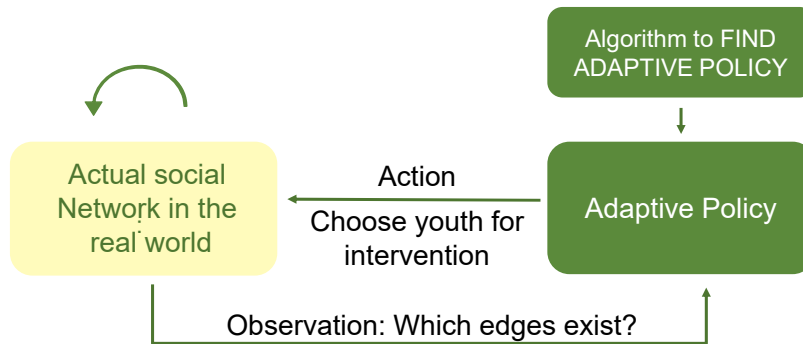

6/27/2017

12

Creating an Adaptive Policy: “POMDP” [2015]

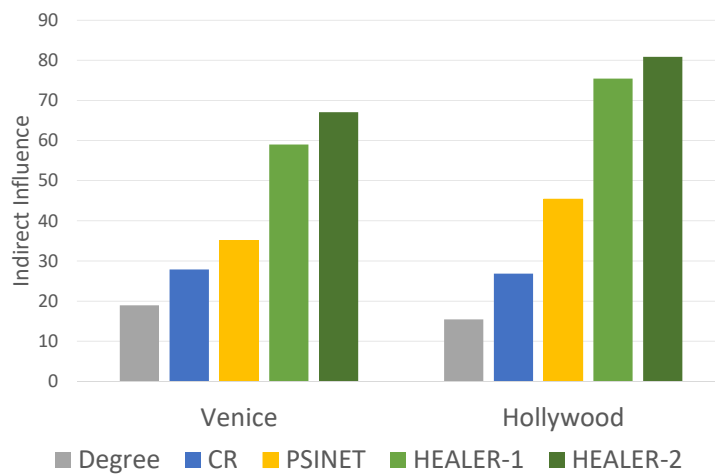

- Homeless shelters – sequentially select nodes under uncertainty
 - Policy driven by observations about edges

6/27/2017

13

Real Networks – Simulation Results [2016-2017]

6/27/2017

14

Pilot Tests with 170 Homeless Youth [2017]

Recruited youths:

HEALER	HEALER++	DEGREE CENTRALITY
62	56	55

Preliminary network → HEALER

Bring 4 youth for training, get edge data → HEALER

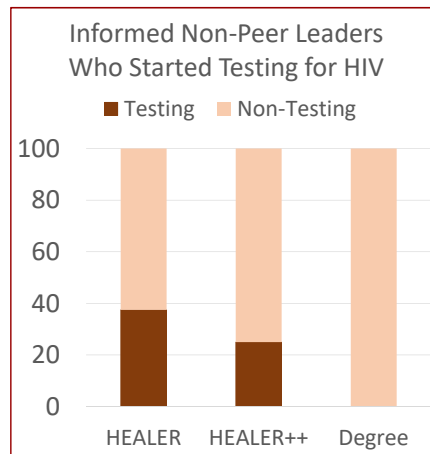

Bring 4 youth for training, get edge data → HEALER

Bring 4 youth for training

6/27/2017

15

Results: Pilot Studies

6/27/2017

16

AI Program: HEALER

6/27/2017

17

Next Steps

- 900 youth study begun at three locations in Los Angeles
 - 300 enrolled in HEALER/HEALER++
 - 300 enrolled in no condition
 - 300 in Degree centrality

*“Picking youth as peer leaders was changing their **self esteem and the sense of confidence** that they could be an **agent for positive change....**”*

Eric Rice

6/27/2017

18

Overview of CAIS Project Areas

AI for Assisting Low Resource Communities

- Substance abuse, suicide prevention...
- Modeling gang violence, matching homeless and homes...

6/27/2017

19

Protecting Wildlife in Uganda

PAWS: Applying AI for protecting wildlife

Poacher Behavior Prediction

Predicting Poaching from Past Crime Data

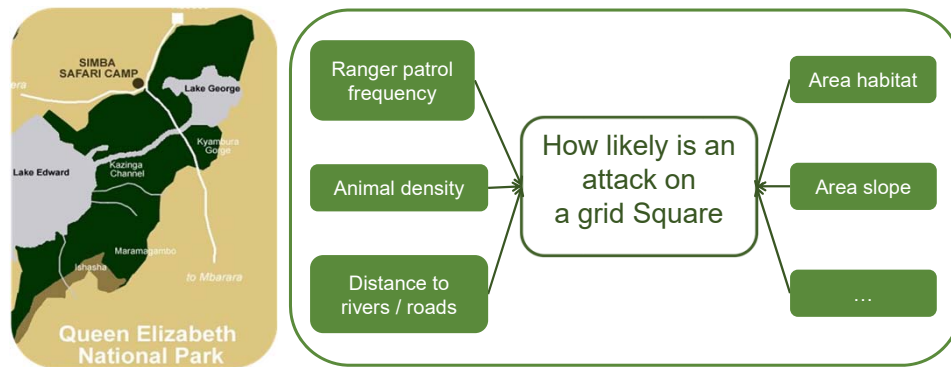

6/27/2017

21

Poacher behavior prediction [2016]

Data from Queen Elizabeth National Park, Uganda

Number of poaching attacks over 12 years: ~1000

6/27/2017

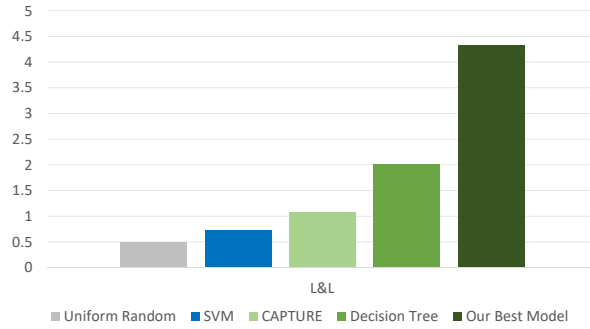

22

Poacher Attack Prediction [2017]

Poacher Behavior Prediction

Results from 2015

6/27/2017

23

Real-world Deployment: (1 month)

6/27/2017

24

Real-world Deployment: Results

- Two 9 sq KM patrol areas: Predicted hot spots with infrequent patrols
- Poached Animals: Poached elephant
- Snaring: 1 elephant snare roll
- Snaring: 10 Antelope snares

Historical Base Hit Rate	Our Hit Rate
Average: 0.73	3

6/27/2017

25

Real-world Deployment: Field Test 2 (6 months) [2017]

- Catch Per Unit Effort (CPUE)
 - Unit Effort = km walked
 - Historical CPUE: **0.04**
 - Our high CPUE: **0.11**

6/27/2017

26

Field Test Side Effects: Queen Elizabeth National Park

- Rangers followed poachers' trail; ambushed camp
 - Arrested one (of 7) poachers
 - Confiscated 10 wire snares, cooking pot, hippo meat, timber harvesting tools.
- Pursuit of poachers
- Signs of road building, fires, illegal fishing

6/27/2017

27

Towards the Future: AI for Social Good

- Significant potential: AI for low resource communities, emerging markets

- Not just applications; novel research challenges:
 - Fundamental computational challenges from use-inspired research
 - Designing AI systems in society:
 - Interpretability
 - Complementing human autonomy

- Methodological challenges:
 - Encourage interdisciplinary research: measures impact in society
